

# Under the Sea - Working Scientifically Skills

## Making simple records of what I notice or how things change

Write about what the shells looked and felt like.

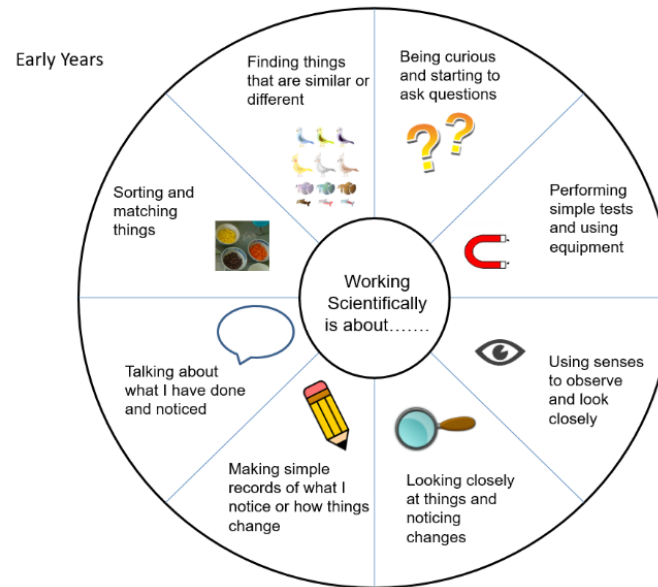

Write about what animals I know live under the sea.

## Talking about what I have done and noticed

Talk about what objects float and which objects sink.

Share what I have found out from using my senses.

Across our activities we will continue to encourage children to develop their understanding of the world

## Being curious and starting ask questions

What can be found in the ocean?

What might we find at the beach?

How do we stay safe near the sea?

How is our environment different to the environment under the sea?

## Using senses to observe and look closely

Explore a range of pebbles and discuss what I can see and feel.

Explore how fish and other animals move in the water.

Explore the different animals that live under the sea.
